

Measuring magnifying glass

Full metal design with replaceable scale plates

ATORN[®]

Application

For measuring surfaces in workshops, laboratories, quality assurance, e.g. measuring indentations during Brinell hardness test

Execution

- Parallax-free, distortion-free reading

Advantage

- Half-open tube with white background for optimum, glare-free illumination of objects
- Brass dial, chrome-plated, high-precision laser graduated
- Superb edge sharpness for near parallax-free viewing

Art. No.	41540 205
Magnification	10-times
Max. length measuring range	10 mm
Scale value	0.1 mm
Lens design	Achromatic
Lens material	Glass

EAN-Code

4050293159998
